CAREER OBJECTIVE

Computer Science undergraduate with practical experience building C++ applications, including a bank management system and a rule-based calculator. Seeking a software development internship to apply core programming and problem-solving skills to real-world projects while continuing to grow as a developer.

EDUCATION

B.Tech, Computer Science & Engineering 2024 – 2028

Shri Vaishnav Vidyapeeth Vishwavidyalaya (SVVV)

Senior Secondary (XII), Madhya Pradesh Board 2024

Garments Public Higher Secondary School | Science | 75.80%

Secondary (X), Madhya Pradesh Board 2022

Tagore Model Higher Secondary School | 91.00%

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Foundations Associate — Oracle, Oct 2025
- Oracle Cloud Infrastructure 2025 AI Foundations Associate — Oracle, Oct 2025
- Data Structures and Algorithms Using Java — NPTEL, Jul–Oct 2025
- Google Workspace Docs Certification — Google Workspace, Jul 2025

PROJECTS

Authentication System [↗](#) Jun 2026 – Jul 2026

- Built a full-stack authentication system with JWT-based authentication and bcrypt password hashing.
- Implemented email verification, forgot-password, and reset-password flows, plus protected routes and a protected dashboard.
- Used a Railway-hosted MySQL database and delivered a responsive UI covering registration, login, and logout.

Currency Converter May 2026

- Developed a tool to convert amounts between currencies based on current exchange rates, with a simple, user-friendly interface.

Bank Account Management System (C++) Feb 2025 – Mar 2025

- Built a menu-driven C++ program simulating core bank operations: deposits, withdrawals, and balance inquiries.
- Applied object-oriented principles (classes, encapsulation) with structured conditional logic.

Command-Line Calculator (C++) Jul 2025

- Developed a console-based calculator supporting addition, subtraction, multiplication, division, and modulus.
- Implemented switch-case control flow with input validation for reliable user interaction.

Rock, Paper, Scissors Game (C++) Jul 2025

- Created a command-line game using rand()-based logic to generate and evaluate computer moves against user input.
- Strengthened understanding of conditional logic, control flow, and random number generation.
